Dear Hiring Manager,

I am writing to express my enthusiastic interest in the Software Co-op position at Firefly Technology Inc, as advertised on [Platform where you saw the advertisement]. The opportunity to contribute to a company dedicated to workplace safety, particularly addressing the critical needs of millions of Americans, deeply resonates with my personal and professional values. The mission-driven approach, combined with the ambitious goals and the experienced team from companies like Verkada and Apple, is incredibly appealing.

My experience aligns well with the requirements outlined in the job description. For instance, I have experience building and shipping products from the ground up, as demonstrated by my work developing a real-time React analytics platform with Flask and PostgreSQL, which served 1,000 enterprise users. This project highlights my ability to create scalable solutions and deliver tangible results. Furthermore, my experience in architecting systems, such as the route-aware fuel optimization widget in Kotlin + Java, showcases my aptitude for making foundational architectural decisions, a key aspect of this role. I am comfortable with ambiguous environments, quick development cycles, and tackling complex problems.

I am confident that my skills and experience, combined with my passion for impactful work, make me a strong candidate for this position. The opportunity to work alongside the founders and early engineers at Firefly, shaping new features and contributing to a life-saving platform, is an exciting prospect. I am eager to learn quickly and contribute to Firefly's success. I look forward to the opportunity to discuss my qualifications further.
