Dear Hiring Manager,

I am writing to express my enthusiastic interest in the Software Engineering Intern position at Liftoff, as advertised. The opportunity to contribute to a company that is revolutionizing fitness through gamification is incredibly exciting, and my skills and experience align perfectly with your requirements.

My background in building full-stack applications, particularly with React, Next.js, and React Native, directly addresses your need for someone to ship features from idea to production. For instance, I developed a real-time React analytics platform with Flask and PostgreSQL, serving 1,000 enterprise users. I also built a React Native dashboard with GraphQL API integration for real-time client metrics. This experience demonstrates my ability to create polished UIs and design clean, maintainable APIs, as outlined in your job description.

Furthermore, my experience with databases and backend services, as well as ORMs, is evident in my previous projects. I built a full-stack platform in Next.js, Prisma, and PostgreSQL with multi-profile management. Additionally, I automated event anomaly-detection pipelines using Selenium + PGVector, reducing processing time. These projects showcase my proficiency in the technologies and skills that will make me a valuable asset to the Liftoff team. I am confident that I can contribute meaningfully to your team's goals.

I am eager to learn more about this opportunity and discuss how my skills can benefit Liftoff. Thank you for your time and consideration.
