Dear Hiring Manager,

I am writing to express my enthusiastic interest in the Software Engineering Intern position at EverCurrent Inc. Your company's focus on AI-native platforms for hardware and manufacturing organizations deeply resonates with my passion for building innovative, impactful solutions. I am particularly drawn to the opportunity to contribute to a product that shapes how real-world products are designed and built in the era of AI.

My experience aligns directly with your requirements. For instance, I architected a route-aware fuel optimization widget using Kotlin and Java, increasing recommendation accuracy by 40% for in-vehicle navigation. This project demonstrates my ability to build complex systems that solve real-world problems and generate tangible improvements. Furthermore, my work in developing a real-time React analytics platform with Flask and PostgreSQL, which serves 1,000 enterprise users, showcases my proficiency in full-stack application development and my ability to deliver scalable, production-ready applications. I am confident that these skills and experiences will allow me to make a significant contribution to your team.

I am excited by EverCurrent Inc.'s fast-moving, impact-driven engineering culture. The emphasis on collaboration, user-centric design, and knowledge sharing perfectly aligns with my values as a builder. I am eager to learn from experienced builders and contribute to the company's success in this rapidly evolving technological landscape. The chance to build core features end-to-end, design system architecture, and work closely with users represents an exceptional opportunity, and I am confident I can contribute positively from day one.
