Dear Hiring Manager,

I am writing to express my enthusiastic interest in the Software Engineering (Android Developer, Kotlin) position at Note AI Inc. As a highly motivated and experienced software engineer, I am particularly drawn to Note AIâ€™s innovative work in the AI-driven note-taking space and the opportunity to contribute to a rapidly growing company. The chance to work alongside industry leaders like Rich Miner is an incredibly exciting prospect.

My experience aligns perfectly with the requirements outlined in the job description. For instance, I have significant experience developing Android applications using Kotlin, as evidenced by my work architecting a route-aware fuel optimization widget in Kotlin and Java. This project utilized a graph-ranking engine to improve recommendation accuracy by 40% for in-vehicle navigation. This demonstrates my proficiency in Android development and my ability to create user-facing features that enhance user experience and improve performance.

Furthermore, my proven ability to develop robust and reliable systems, such as the tire-pressure system I engineered in C++ via HAL + AIDL, will allow me to contribute directly to Note AI's product development. This experience building low-level systems that require reliability and performance will be valuable. I am eager to leverage my skills to contribute to the advancement of Note AI's cutting-edge product. I am confident that my technical skills and enthusiasm make me a great fit for your team.
