Dear Hiring Manager,

I am writing to express my enthusiastic interest in the Full Stack Developer Intern position at Swift App Inc. Your company's mission to build world-class software for sports facilities deeply resonates with me, and I am particularly drawn to Swift's focus on empowering sports businesses and enhancing the experience for athletes and families. The opportunity to contribute to such a meaningful cause, combined with the chance to work in a fast-growing, self-funded startup, is incredibly appealing.

My experience aligns well with the requirements of this role. For example, I have hands-on experience in full-stack development. I developed a real-time React analytics platform with Flask and PostgreSQL. I also built a full-stack platform in Next.js, Prisma, and PostgreSQL with multi-profile management. I am confident in my ability to contribute to front-end and back-end development, specifically in areas like performance improvements, feature development, and bug resolution. My ability to rapidly learn new technologies and take initiative will be an asset to your team. I architected several Node.js services with WebSockets + S3 for image aggregation.

I am particularly excited by the opportunity to leverage GPT's to reduce facility setup time and to revamp reports. These projects align with my skills and also the passion for continuous growth. I am eager to apply my skills to help Swift App Inc. achieve its goals and further develop my skills as a full stack developer. I am confident that I can make a significant contribution to your team.
