Dear Hiring Manager,

I am writing to express my enthusiastic interest in the Full Stack Developer Co-op position at NewPath Consulting Inc, as advertised. The opportunity to contribute to AccountBridge and work with React, Vite, and Node.js truly excites me, especially given NewPath Consulting's commitment to building user-friendly applications and automating workflows for associations and nonprofits. My experience aligns perfectly with your requirements, and I am confident I can make a significant contribution to your team.

My background in full-stack development, particularly with React and Node.js, makes me a strong candidate for this role. For example, I built a real-time React analytics platform with Flask and PostgreSQL, serving 1,000 enterprise users. This experience has equipped me with a deep understanding of front-end and back-end integration, API design, and data management, skills I am eager to apply to the development of AccountBridge. Additionally, my experience automating pipelines, such as automating PR validation pipelines with n8n and GitHub Actions, aligns well with the automation workflows mentioned in the job description.

Furthermore, I am particularly drawn to NewPath Consulting's focus on integrating systems and streamlining processes. My experience developing a real-time course notifier with FastAPI, AWS Lambda, and DynamoDB, serving 80K+ students with <200 ms query latency, demonstrates my ability to design and implement efficient, scalable solutions that meet real-world user needs. I am enthusiastic about the opportunity to learn and contribute to a company that prioritizes innovation and user experience. I am confident I can quickly adapt to your environment and make a valuable contribution.
